POSITION**

imperix

PROJECT ENGINEER

Contract type Long-term contract, 70-100%.

Starting date As soon as possible.

ABOUT US

Imperix is a Swiss company commercializing prototyping equipment for power electronics, electric drives, smart grids and related topics. Its products are designed to accelerate the implementation of laboratory-scale power converter prototypes and facilitate the derivation of high-quality experimental results. Its customers are world-class universities and industries that have a strong focus on research and typically intend to validate state-of-the-art control techniques or new power converter topologies.

The company offers various levels of services, ranging from the sale of bare products to the delivery of full turnkey solutions that include significantly customized hardware and software. Today, over 90% of sales are made abroad, with customers in more than 30 countries.

Founded in 2013, imperix is a young and dynamic company of about 15 people. It is located in the lively city center of Sion.

JOB DESCRIPTION

At imperix, engineering activities can be roughly subdivided into product development and customer-oriented projects. The first category encompasses prototyping solutions for power electronics. The second category involves control implementation (software), either intended for systems built using imperix products, or larger industrial facilities.

In this context, imperix seeks to reinforce its team with a project engineer who can lead custom development projects, from early commercial discussions and specification stage to the delivery, acceptance tests and customer support. The related responsibilities are as follows:

- Manage customer-specific projects and undertake all related tasks.
- Assist sales engineers in determining project specifications, tasks, related budget and schedule.

- Identify project responsibilities, delegate work packages to the appropriate staff.
- Execute selected engineering tasks as one of the project contributors.
- Maintain budgets and schedules up to date, while keeping a close contact with the customers.
- Write technical and/or commercial documentation (English).

REQUIREMENTS AND QUALIFICATIONS

Education and experience BSc or MSc in electrical engineering or similar field of studies.

Seniority Junior to mid-senior. Prior experience in power electronics and technical project management is a plus.

Language Excellent communication skills in English, as well as French or German, both written and spoken.

THIS POSITION WILL SUIT YOU IF

- You are seeking to work in a dynamic, fast-paced environment.
- You are self-motivated and capable of working both individually and as part of a team.
- You are a down-the-earth person with a natural focus on bringing effective solutions.
- You are comfortable with responsibilities and capable of meeting with strict deadlines.
- You have good inter-personal communication skills.
- You are looking for a position giving place and granting value to your initiatives.
- You appreciate a young and friendly environment that is also serious and professional.
- You need a flexible schedule and/or the ability to work remotely.

If you feel like working with us, please send us your CV along with a cover letter explaining your motivations and what you would bring to the team. Email correspondence should be addressed to jobs@imperix.ch. We reserve the right to maintain correspondence only with profiles that reasonably correspond to the position.
